This SAFe certification is a must-have for executives, project managers, leaders, quality assurance professionals, and enterprise and solution architects who seek to advance their careers. The SAFe training helps learners prepare to take the SAFe Agilist certification examination while helping them improve communication and focus through agile implementation. It begins by discussing how to lead an enterprise agile transformation and how to apply lean thinking techniques to team, program, & portfolio levels. It goes on to explore how lean, agile, and product development flow principles can be used to improve productivity, employee engagement, time-to-market, and quality. It empowers learners to infuse agile in their organizations, beyond just the IT functions, while aligning the efforts of agile and non-agile teams to create great stakeholder value. With this SAFe online course, learners would imbibe capabilities to collaborate across all layers of the organization enabling them to deliver cross-functional projects and tasks effectively.

Cognixia's SAFe Agilist certification course is highly recommended for all members of an agile team including but not limited to change agents, program managers, agile coaches, project managers, and anyone who is currently or aspiring to lead a SAFe implementation.

Prerequisites

Completing the Foundations of Agile certification would be helpful, though not mandatory.
